Academic Staff Emerita  
mhoddy@wisc.edu

Tara Cordes  
University Health Service  
tjcordes@uhs.wisc.edu
1. What Is Appreciative Inquiry?

AI is both a PROCESS and a way of THINKING.

**Appreciate + Inquiry**

*Ap-pre’ci-ate*, v., 1. valuing; the act of recognizing the best in people or the world around us; affirming past and present strengths, successes, and potentials; perceive things that give life (health, vitality, excellence) to living systems 2. increase in value, e.g. the economy has appreciated. Synonyms: VALUING, PRIZING, ESTEEMING, and HONORING.

*In-quire*, (kwir), v., 1. the act of exploration and discovery. 2. To ask questions; to be open to seeing new potentials and possibilities. Synonyms: DISCOVER, SEARCH, and SYSTEMATIC EXPLORATION, STUDY.

**AI seeks to discover the root causes of success rather than the root causes of failure.** Jim Taylor, Rolyat Corp LTD

**Take Aways:**
- Practice the beginning of an Appreciative Inquiry process
- Analyze some of the assumptions as to WHY appreciative inquiry works
- Consider some practical ways to apply AI without knowing the whole model

To Begin: Choose the positive as the focus of inquiry

⇒ Critical first Step
⇒ Whatever you focus on grows
Focus On What Works To Get Started

The AI Interview

Most of us are working to make the world a better place – in our workplaces, our families, and our communities. By necessity, that requires change. Change at any level, can be both stressful and incredibly energizing. When change is a planned, inclusive effort towards a shared goal it can inspire commitment and teamwork. The results may even exceed the original vision.

A. With your partner share a story about a time when you experienced working through a change which energized you and made you feel alive and excited about your involvement. It could have been a small change or a large-scale change that affected many other people. It could have been on the job, at an organization you volunteer with, or in your family. It could have been change you initiated, or were just a participant in. Be descriptive in telling your story.

• What was the change? What did it look like? Sound like? How did you feel?

• Who were the other significant people involved in this experience?

• What did they do that contributed to this special time?

B. Without being humble, what did you contribute to creating the successful change experience? Be specific.

C. After 5 minutes we will switch roles and have the other person tell their story.

Tips for the Interviewer

☞ You want the speaker to share the vivid details of the story. Be genuinely curious about their experiences, feeling and thoughts.

☞ Let the person tell their story. Do not tell yours or give opinions about the experience.

☞ Allow for silence. Sometimes we need time to think!

☞ It is okay to probe for further information. Some possible statements or questions are:

  • Tell me more.
  • What caused you to feel that way?
  • How did it affect you?
  • What do you think was really making it work?
  • What was your contribution?

☞ Dig deep when listening. Search for values and those things that matter to the storyteller.
D. After the second person finishes, share your response to this question:

**If the pair of you had up to three (3) wishes for your future experience with change, what would they be? Write your wishes below.** We’ll get back to them in a few minutes.

<table>
<thead>
<tr>
<th>Our Wishes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

**As a large group, how did this process feel?**

“They appreciate Inquiry (AI) involves making a very conscious and deliberate choice to ask only positive questions when we seek to understand what is needed to make life better in organizations.”

Jim Taylor, Rolyat Corp LTD.

“The universe is made of stories, not of atoms.”

Muriel Rukeyser, American poet and writer
The Appreciative Inquiry Model

To Begin: Choose the positive as the focus of inquiry
 Critical first Step
 Whatever you focus on grows

- Discover: Inquire into stories that find strengths or what’s working; locate themes that appear in the stories
- Dream: Select themes or topics for further inquiry
- Design: Create shared images of the future you want
- Deliver/Destiny: Find innovative ways to create that future

See “Job Aids & Additional Materials”, pages 8-9, for a summary of steps in AI process.

A. *Put two pairs together to form small groups.*
   Share the wishes you captured from your story-telling.
   • What are you hearing as you share your wishes?
   • What themes do you hear?
   • What common ground does your table group have?

Write the themes / common ground you hear in the box below for our next exercise.
What is missing? Are there any themes you think should be included?

<table>
<thead>
<tr>
<th>Our Themes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

B. *As a large group,* participate in our scattergram exercise.
   Note: In this exercise we are looking for the energy in the room, not consensus!

<table>
<thead>
<tr>
<th>Themes</th>
<th>Dots</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

C. What do you notice? What surprises you? What does this say about our class?
Underlying Assumptions of AI
From the *Thin book of Appreciative Inquiry*, Sue Hammond

1. **In every setting and system something works!**
   - If you can picture what is not working, you can picture what could work
   - Or you could dream what might work

2. **Organizations move towards the most positive image of themselves.** (In science, called **heliotropic**.)

3. **The act of asking questions influences the setting / system in some way.**
   - What we focus on becomes our reality
   - Reality is created in the moment and there are multiple realities
   - The language we use creates our reality

4. **We have more confidence and comfort if we journey forward with parts of our past.**
   - We should carry forward the parts of our past that worked best

5. **All steps are collaborative.**
   - Every voice counts
   - Every voice deserves to be heard
   - Each individual has value and merit

6. **Outcomes should be useful.**
7. **Address the psychology of change**
   - Statistics have shown that 80% of change efforts fail
   - Must effectively engage people in process
   - People do not resist change as much as they resist being changed

---

*In the large group,*
which assumptions have you seen us use or talk about today? Be specific.
Practical Ways to use AI (Without knowing the whole model)

In your small groups, identify from your change stories and note in the box below:
- A few things that helped the process work
- What could have been better?

<table>
<thead>
<tr>
<th>What’s working? (or What worked?) (Continuity)</th>
<th>What could have been better? (Transition – plan, evaluate, improve)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Other Ways to Use AI in my Organization

Individually,
How else are you using, or could you use an AI approach in your workplace or in other organizations that you are involved with?

<table>
<thead>
<tr>
<th>Ways I might use AI in my workplace</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Conversation before performance reviews (see page 13)</td>
</tr>
<tr>
<td>• Coaching</td>
</tr>
<tr>
<td>• Strategic Planning</td>
</tr>
</tbody>
</table>

See “Job Aids & Additional Materials”, pages 14-15, for more examples of applications of AI in the workplace.

Thank you for your active participation in this class!
Choose an Affirmative Topic: Before beginning an AI process, the organization must identify what they want to learn about. The first question is fateful, as the organization will grow in the direction of inquiry. The consultant describes the AI process and agrees with the client on a process that is appropriate to this organization. A typical process includes:

1. Introduce AI to the client (Chair, CEO, Executive Team, etc.)
2. Establish guidance and support structure within the organization (Training Department, Professional Development Committee, etc.)
3. Create a customized interview guide for the inquiry process
4. Create a plan for the interview process

1. Discovery Phase — Appreciating the Best: In the Discovery phase, we collect stories that value the best of what is and identify emerging themes from the interviews. A typical process includes:

   1. Pairs interview each other for 5 - 60 minutes each. Interviews include a story of something working at its best and 3 wishes for the future.
   2. Two pairs join and identify key themes or threads from the interviews.
   3. Create a chart (for example on a flipchart) with all themes or threads. Combine or rewrite themes as they emerge from groups.
   4. Create a scattergram with each person placing 3 dots on the theme that they are drawn to or are most important to them.
   5. The dots represent where the energy lays. Dialogue on what the group sees. e.g. “What surprises you?” or “What does it say about our organization?” Keep all themes for future use.

<table>
<thead>
<tr>
<th>Themes</th>
<th>Dots</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>* *</td>
</tr>
<tr>
<td>2.</td>
<td>* * *</td>
</tr>
<tr>
<td>3.</td>
<td></td>
</tr>
<tr>
<td>4.</td>
<td>*</td>
</tr>
</tbody>
</table>

An alternative process includes:

1. Identify core group of interviewers.
2. Interviewers conduct individual interviews with all staff. If the group is large, initial interviewers can train a second (or third) tier of interviewers who interview the remaining staff.
3. Interviewers meet to identify themes or key ideas that emerge from the interviews.
4. Create a scattergram of all themes.
5. Create process so all participants can place 3 dots on the themes and reflect on what they see.
2. **Dream Phase — Envision possibilities:** The dream phase challenges the status quo by envisioning a preferred future. Stakeholders engage in possibility conversations about the organization’s potential, its calling and the unique contribution it can make. To define and articulate the dreams, a typical process includes both “right-brain” and “left-brain” activities, for example:

1. Each small group selects one of the themes that they feel energy around.
2. Together they create a Graphic Representation of the preferred image. This can be as simple as a drawing with markers on flipchart paper, but it can also include colored paper, stickers, etc. The representation can also be a skit or song that captures the dream.
3. Groups then translate their image into language by creating a Provocative Proposition, which states in one sentence the essence of their dream in the present tense, as if it were already happening.
4. Each group shares their Graphic Representation and Provocative Proposition with the large group.

Note: Macro Provocative Propositions apply to the organization as a whole. Micro Provocative Propositions apply to a discrete part or particular function of the organization.

3. **Design Phase — Create shared images of future:** In the Design phase, we translate the Dream into language of the organization’s social architecture – all the formal and informal structure that sustains the essence of the organization. Using the images and provocative propositions as a guide, the group begins to align the organization with the dream. Two typical approaches are:

   **Individual Action Approach**
   1. Each employee considers the part of the dream they want to bring to life.
   2. Individuals make simple commitments, offers, and/or requests.
   3. Individuals move their commitments to action.

   **Whole System Design Approach** uses traditional and non-traditional Organizational Development models, such as:
   1. Teams create a Goose Egg Framework to view stakeholders/people and systems/processes related to each Provocative Proposition.
   2. Individuals, teams, or departments can move to traditional Organizational Development models to design.

4. **Delivery/Destiny Phase — Create the appropriate innovation:** In the Delivery/Destiny Phase, the organization fleshes out, experiments with, and redesigns the innovations that it identified during the Design phase. Employees continue to work to identify, highlight, and expand on what is working well.

   The main challenge that groups face during this stage is sustaining – and even magnifying – the inspiration that characterizes the earlier phases. We come from a “project mentality” that values clear starts and conclusions. But we are increasingly confronted with a world in which change does not occur during a separate time period, after which we get back to business as usual. Rather, change is now the very water in which we swim.

   Adapted from Jane Magruder Watkins and Bernard Mohr, *Appreciative Inquiry: Change at the Speed of Imagination.*
Dealing With The Negative(s)

We are well trained to find the negative in things. We are "socially constructed" to see, identify and attempt to solve the problems that exist in any human system. So what can we do when confronted with folks who just cannot seem to get past the negative/problems when doing an appreciative process?

Use The Negative Information
Anything that someone can find wrong with a system or situation stems from the absence of something they value in that system or situation. Turn the perspective on the situation to find out what, if present, would create the ideal conditions and/or organization given the problem or issue. For example, someone might comment, "There is no respect here for what the other things that might be going on in peoples' lives beside this work."

As the interviewer you might respond, "When you say that it means that you have some idea in your mind about how respect for someone outside of work might look like. Can you tell me what that image is? How would this workplace be different if that level of respect were present?" If they continue to struggle, use their negative information and try to reframe it yourself into a positive image. Every negative image is conditioned by an affirmative image!

Postpone
Make a verbal, and if appropriate written, note of what they said and then come back to it later in the process. A good time to pull it back in is when people are writing their wishes for the future of their organization. As the interviewer, be sure you do actually get back to the information!

Listen!
If there is genuine passion and intensity about what they are saying, let them say it! As a facilitator you will get nowhere on the appreciative side if the focus of their energy is the negative. Sometimes people need to vent. While this may mean wallowing through some organizational quicksand, that is better than having it block the process and losing any capacity to be appreciative. Keep working to craft a caring and affirmative spirit.

Redirect and Broaden the Perspective
If there is less passion present attempt to redirect the conversation back to the affirmative. Paraphrase the problem(s) that have been raised and ask them to think of a time when this was NOT true, when things were working best. If the response is that this never happens, then broaden the perspective to situations outside of the system/organization in question. Ask them to think about when it was working best anywhere, in any context.

It helps me to remember that for a negative image to exist there must first have been a positive image in mind. One of our roles is to help people focus on that positive image and how we might co-construct a reality to get there.

Adapted from Jay Ekleberry, Wisconsin Union, UW-Madison
Sample Research on Positive Image
And the Influence of Anticipatory Reality

There are hundreds of scientific experiments that have been conducted over many years that point to the power of the mind to impact, if not create, our reality. A web search of credible sources shows ongoing studies that still support how positive imaginary impacts our performance and our beliefs.

Workplace
- **Positive Psychology:** Barbara Fredrickson, a positive psychology researcher at the University of North Carolina, published a landmark paper that is among the most referenced and cited in her field. Negative emotions prevent you from seeing options in your life. When you are experiencing positive emotions like joy and contentment, you will see more possibilities. James Clear blog, [http://www.huffingtonpost.com/james-clear/positive-thinking_b_3512202.html](http://www.huffingtonpost.com/james-clear/positive-thinking_b_3512202.html)

Health
- **Placebo:** Healing occurs based on the belief that it will occur. Historically, 30 – 60% of subjects respond positively to placebo. The affect is even stronger in “double blind” experiments when neither patient nor doctor knows which dose is the placebo.
- **Imbalanced inner dialogue:** We all have an “inner newsreel” going continuously, projecting ahead of ourselves both optimistic and fearful images. One study with patients recovering from heart surgery showed unhealthy people have 1:1 ratio of good : bad images. Healthy people have 2:1 ratio of good : bad images.

Education
- **Pygmalion:** Famous study from the 1950’s. When teacher are told that certain children (randomly selected) are gifted, the children begin to have superior performance caused by the teacher’s behavior as influenced by expectations. The effects, positive and negative, become nearly permanent.

Sports
- **Imaging positive sports performance:** Athletes from golf, basketball, and many other sports tell stories about their mental process that lead to excellent performance.
- While early reports were more antdotal, newer research along with brain imaging supports mental imagery plus practice is significantly better than practice alone. [http://www.vanderbilt.edu/AnS/psychology/health_psychology/mentalimagery.html](http://www.vanderbilt.edu/AnS/psychology/health_psychology/mentalimagery.html)

### Evaluation Worksheet

AI Application: Pre Performance Review Dialogue Worksheet

R-A-P WORKSHEET
Review - Analyze - Plan

This form is a self-evaluation tool for employees and offers feedback to supervisors and employees on accomplishments that the supervisor may have forgotten or did not realize were significant to the employee. The R-A-P form is yours to keep; it will not be turned in your supervisor.

REVIEW
What’s going well? What happened last year that you’re most proud of? /or/ What were your major accomplishments in the last year?

ANALYZE
What things do you wish had gone better? What did you learn or how are you still resolving it?

What would help you do your best?

PLAN
What are the most important things that you would like to accomplish in the next year?

What resources, including job-related education or training, could help you accomplish your goals?

What professional development would help you in your career progression?

How else could your supervisor help you?

## Agenda 1 from ongoing meeting incorporating AI Discovery and Design Phases

**Wisconsin Union Employee Engagement Group**  
**Agenda**  
**Thursday, March 27, 2014, Union South, Governance, 2nd Floor**  
**9:30 – 11 am**

Chair/Leadership Team Sponsor: Hank  
Facilitator: Mary Hoddy  
Timekeeper/Tangent Control: Clair  
Scribe: Fei  
Members: Kevin, Heather, Lindsey, Rod, Amy, Henry, Bob  
Unable to attend: Jill

### Meeting Goals:
- Identify themes of what successful appreciation and recognition looks like  
- Identify and compare Union wide themes and issues from Winter Gatherings to our themes of Appreciation & Recognition

<table>
<thead>
<tr>
<th>Issue</th>
<th>Notes</th>
<th>Time</th>
<th>Who</th>
</tr>
</thead>
</table>
| **Housekeeping & Minutes** | • Review meeting goals  
• Review Action Items on Minutes | 9:45 am  
(5 min) | Hank |
| **Identify Themes of Appreciation and Recognition** | | |
| **Review ½ of Flipchart summaries for Union wide issues** | In pairs, describe a time when I truly felt appreciated. (It can be small or significant.) Share these things:  
• What specifically was meaningful to you?  
• Why was it meaningful to you?  
• Themes you found in our stories  
• What does successful recognition look like? | 9:50 am  
(10 min) | Mary |
| **Identify and compare Themes of Appreciation and Recognition from Winter Gathering/** | | |
| **Review ½ of Flipchart summaries for Union wide issues re: Recognition** | Break into 2 halves.  
1. Dining Services and Admin  
2. Facilities and Program  
Flip chart: the themes you find. | 10:10 am  
(15 min) | Mary |
| **Large group** | Large group share themes.  
• Where did you find similar themes between your 2 Areas?  
• Where did you find different themes?  
• What impact might this have for our recognition planning? | 10:25 am  
(20 min) | Hank |
| **Create Agenda for 4/3 meeting** | • Create proactive statement for what success would look like as we create an appreciative environment at the Union (building on the work we did 3/27)  
• Consider: Is success different for blue/white collar? | 10:55 am | Hank W |
| **Adjourn** | | 11 am |
